

The Ferroli logo, featuring the brand name in a bold, black, sans-serif font with a small orange swoosh above the 'i'.The text "ITALIAN WATER HEATER" in a black, sans-serif font, with a small Italian flag (green, white, and red) positioned below the words.

HEAT PUMP

Ferroli's Heat pump water heater range have an array of advantages ranging from the energy efficiency to durability & design

DISPLAY CONSOLE

Microprocessor controlled big LED digital display console for the ease of use by customer to set the timer and control the temperature.

ENERGY SAVING

Comparing the standard electric water heater, Ferrolli heat pump water heater saves up to 75% of the energy.

ALL SEASON USE

Since it draws heat from air, the product continues to supply hot water in all weather conditions irrespective of the water heater location.

MICRO CHANNEL HEAT EXCHANGER

The heat transfer is even & faster as the refrigerant passes through the heat exchanger holes & the transfer of heat is evenly distributed to the water in the tank.

ENVIRONMENT FRIENDLY & CFC FREE INSULATION

There is no discharge of any harmful fumes chemicals to environment during the use of Ferrolli heat pump water heater & hence its an eco-friendly green product

FULLY AUTOMATIC

Microprocessor controlled by fully automatic operation. Ferrolli heat pump water heater can work efficiently under different weather conditions.
